

What to Expect From Your Tune-up

As every Texan knows, when the temperature starts to soar, so do your energy bills. A CoolSaver A/C Tune-up can help cut your cooling costs by up to 30%. Our state-of-the-art diagnostic tools and procedures will result in cooler air inside your home, increased A/C performance and lower energy usage.

During your CoolSaver A/C Tune-up, the participating contractor will perform the following services:

- Measure indoor airflow and correct.
- Clean outdoor condenser coils.
- Inspect indoor coil and clean.
- Inspect indoor blower and clean.
- Assess refrigerant charge and refill using a digital refrigerant analyzer.

With AEP Texas' CoolSaver Program, you can **save up to \$150** toward the cost of a high-performance tune-up on your A/C system or **receive an incentive of up to \$1,225** on qualifying A/C system replacements.

Questions?

Email aeptx.coolsaver@clearResult.com or call 512-399-8842.

All components must be accessible to qualify. If they are not accessible, the equipment is ineligible for incentives. Other program requirements and restrictions may apply. Customer is responsible for cost of refrigerant. Contractor will provide a quote for replacement refrigerant to be approved by customer prior to refilling.

CoolSaver

Time to Get Cool and Save Energy

Just like a car, your cooling system requires professional service to run safely and smoothly. Congratulations on taking this step toward a cooler, more energy-efficient home.

Customers who have received a CoolSaver A/C Tune-up enjoy the benefits of:

- Longer-lasting and improved performance of equipment
- Greater efficiency and lower cooling costs
- Improved comfort and humidity control

How did we do?

Once you've completed your A/C tune-up, please share your feedback.
