

Available incentives

AEP Texas offers big savings on projects to help cover the cost of energy-efficient upgrades like LED lighting, refrigeration upgrades, HVAC improvements and more.

Customers can receive **up to \$750/kW (Central Division) or \$850/kW (North Division)** reduced on their project to help cover the cost of new energy-efficient upgrades.

Eligible projects

- Ceiling/attic insulation
- LED lighting upgrades*
 - Indoor and outdoor signs
 - Tubes, bulbs and fixtures
- Occupancy sensor installations
- Refrigeration
- Direct install no-cost measures
 - Air infiltration (door sweeps and weatherstripping)
 - Smart thermostats
 - CoolSaver A/C tune-ups
- HVAC and more

**LED fixtures and lamps must be qualified by a third-party agency.*

Program benefits

The program was designed to address the unique needs of a small business and pays a higher incentive when compared with other commercial programs. This helps to cover a greater portion of the project cost, reduces the out-of-pocket spend on energy-efficient upgrades and reduces the payback period.

By scheduling a facility assessment with a participating contractor, you will be able to learn about energy-saving opportunities and create a plan that can benefit your business.

**It's your bottom line –
take control of your
energy choices.**

Energy-Saving Solutions for Small Business Customers

Learn how you can lower your energy bills.

AEP Texas Small Business Direct Install Program

The program offers:

- **Free**, no-obligation facility assessment to identify potential energy-saving opportunities
- **Recommendations and estimates** of energy savings, project costs and payback periods
- **Installation** of approved energy-saving equipment by a local pre-qualified contractor
- **Incentives** paid directly to your contractor by the program to reduce your costs of adopting energy-efficient equipment
- Ongoing reduction in energy costs

Who is eligible?

Small commercial customers with:

- A valid ESI ID number
- ≤ 150 kW peak demand at any one facility or a total demand of ≤ 250 kW at all facilities owned by the same customer within the AEP Texas service territory

Let's get started.

1. A participating contractor will schedule a no-cost walk-through assessment of your facility.
2. Review and sign the energy savings proposal to reserve program incentives.
3. The participating contractor will install the savings measures within 60 days of the signed agreement.

Typical project scenario

This hypothetical example illustrates a scenario that could take place at a small office building. Simulated existing conditions and sample proposed retrofits are listed with a summary estimate of energy and cost savings below.

The data shown at right illustrates how the program operates and its potential value, but is not necessarily indicative of what you may see at your site. Schedule a facility assessment to get a comprehensive proposal outlining specific information related to your business.

EXISTING INTERIOR LIGHTING	INTERIOR LIGHTING RETROFIT
40 32-Watt 4-Lamp Fluorescent Fixtures	80 18-Watt LED T8 Tubes*
16 60-Watt Incandescent	16 10-Watt LED Screw-In Lamps
10 75-Watt 8ft 2-Lamp Fluorescent Fixtures	20 42-Watt 8ft LED Tubes

*4-lamp T8 fixtures reduced to 2-LED lamps
